To Do

Improve Bug

Description

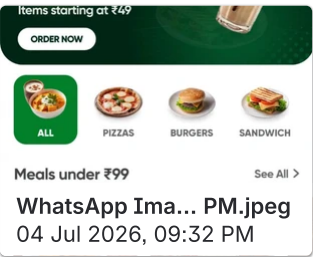

Steps to Reproduce:

1. Open toing app
2. Go to any food section on home page
3. Scroll down and browse through multiple food items
4. Continue scrolling until you reach a non-veg item further down the page
5. Now enable the veg filter
6. Observe the page behavior

Expected Result: Veg filter should apply and filter results while maintaining the user's current scroll position on the page.

Actual Result: Page completely refreshes and jumps back to the top of the home page, making the user lose their browsing position and start over.

Cash on Delivery option remains active when delivery instructions prevent any contact with customer

▼

Description

Steps to Reproduce:

1. Open toing app

2. Add any item to cart

3. Go to cart section

4. Click on "Instructions" option

5. Select these three instructions together — "Avoid calling", "Avoid ring bell", "Leave parcel at door"

6. Proceed to payment section

7. Observe available payment options

Expected Result:

Cash on Delivery option should be automatically disabled or a warning should appear — since delivery person cannot call, ring bell, or make contact, collecting cash payment is impossible.

Actual Result:

Cash on Delivery option remains active and selectable even when all three no-contact instructions are selected, creating an impossible delivery scenario.

TFDABR-3

resets after deleting and recreating account with same phone number

▼

Description

Steps to Reproduce:

1. Create a new account on Toing with a phone number

2. Observe the new user offer — free delivery on orders above ₹129

3. Use the offer until it expires after certain number of orders

4. Delete the account from app settings

5. Create a new account using the exact same phone number

6. Check delivery offer on orders above ₹129

Expected Result:

Free delivery offer should not be available again since the same phone number was already used — offer should be linked to phone number, not just account

Actual Result:

Free delivery offer becomes active again after account deletion and recreation with same phone number, allowing users to exploit the offer repeatedly

Delivery countdown timer stops updating and remains stuck at "2 minutes" even after actual time has passed

Description

Steps to Reproduce:

1. Open Toing app

2. Place a food order

3. Go to order tracking screen

4. Observe the estimated delivery countdown timer

5. Wait when timer reaches near "2 minutes"

6. Continue observing for next 3-5 minutes

Expected Result:

Timer should continue counting down accurately and reflect the actual remaining delivery time

Actual Result:

Timer freezes at "2 minutes" and does not update even after 3-5 real minutes have passed
